

CRs fixed with GeoMedia Desktop patch v15.00.0000.10254

Instructions to install this patch release:

1. Exit all GeoMedia applications.
2. Ensure that GeoMedia Desktop 2015 SP1 is installed.
3. Extract the .zip file to some temporary folder location.
4. Right-click on Setup.exe and use the "Run as Administrator" option.
5. Use the **Update** option to begin the installation process.

If an uninstall of this patch is required, it is recommended that you re-run setup.exe and select the Remove action for patch v15.00.0000.10203 from the Intergraph Setup Manager dialog.

The following CRs are fixed with this v15.00.0000.10254 GeoMedia Desktop patch

GM Desktop CR 1-H4EPPV / MO 1-H4EPSX - A Manipulate Feature Web Service (WFS) does not support case-insensitive searches this was done per GeoMedia WebMap CR 1-6ZEJBE / MO 1-CWG12K

-GM Desktop CR 1-I98R63 / MO 1-JF5M9O - Validate Connectivity Unbroken Intersecting Geometry results in automation error.

-GM Desktop CR 1-G99UQI / MO 1-G9BJWG - Low certainty score values returned on short links where valence = 2

-GM Desktop 1-FFFCS9 / MO 1-FFSSPH - Fusion Links created incorrectly.

-GM Desktop CR 1-JY358F / MO 1-K2P4EL - SmartStore features containing a single point do not display when spatially filtered

-GM Desktop CR 1-K3FXFK / MO 1-K3TBVB - Validate Connectivity to fix Unbroken Intersecting Geometry results in loss of data or invalid geometry

-GM Desktop CR 1-K4DOCB / MO 1-K6OR4Q - Performance using shared cache via PublishIFC is not as good as expected (compared to local cache)

-GM Desktop CR 1-K5VIC2 MO 1-K6N3TU - Time to load record sets 5x slower after reboot when using caching
